Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5, 8-10, 12, 14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayes et al. (U.S. Patent No. 5,020,519).

Hayes et al. disclose a spinal rod approximator device (10) comprising an implant-gripping member (14) having a distal portion that extends in a direction substantially transverse to a longitudinal axis (A) of a proximal portion of the implant-gripping member (44), where the distal portion includes opposing legs (44, 62), formed on a substantially planar U-shaped member (best seen in Figure 4), that are adapted to be positioned under a distal end of a rod-receiving member of a spinal implant (2); a rod-engaging member (83), comprising of opposed arms (86) each having a rod-receiving recess (88), slidably coupled to the implant-gripping member along the longitudinal axis of the proximal portion at a position proximal to the implant-gripping member, the rod-engaging member having a distal portion that extends transverse to a proximal portion (see Fig. 4); and a pusher member (73) freely-rotatably coupled to at least one of the implant-gripping member and the rod-engaging member and threadably mated to the other one of the implant-gripping member and the rod-engaging member such that the rotation of at least a portion of the pusher member is effective to move at

least one of the implant-gripping member and the rod-engaging member with respect to one another. The rod-engaging and implant-gripping members are offset from the sliding axis (as seen in Fig. 1 below).

Response to Arguments

Applicant's arguments with respect to claims 1-3,5,8-10,12,14 and 16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3733

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
